DETAILED ACTION

1. This communication is in response to amendment filed 6/21/2006.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/21/06 has been entered.

Response to Amendment

3. Claims 11-13 have been amended.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The claimed inventions pertain to a method for valuating a financial instrument related to weather.

The following prior art references have been deemed most relevant to the allowed claim(s):

Art Unit: 3693

Daughtery, III (US Pat. 6263321) discloses an apparatus and process for automatically calculating options for use in a variety of markets, such as commodities or securities markets. Daughtery fails to disclose any aspect of weather derivatives or weather based financial instruments.

Studwell, Aaron Weather Derivatives,/ American Meteorological Society, 11th conference on Applied Climatology, January 10-15, 1999, pp. 36-40. This reference described use of weather derivatives in financial industries such as insurance companies and energy markets.

Lucchetti, Aaron ; "Cold Winter On the Way? Some Bet On It" wall Street Journal', New York; Nov 6, 1997 describes a general state of the weather derivative market. No details about the pricing of the weather derivatives are provided.

Claims 11-13: Daughtery, Studwell and Lucchetti as discussed above as the Closest Prior art of record fails to teach or suggest, singly or in any combination, a method or an apparatus of valuating a financial instrument related to weather comprising determining the value of the financial instrument by applying a pricing model using a forecasted weather condition measure, historic weather condition measure for a geographic region of interest for a corresponding time period, and annualized standard deviation of the natural logarithm of the quantifiable weather condition related to the financial instrument.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
